

Flowchart and Algorithm

Step 1: Start

Step 2: Declare the variable Grade as float

Step 3: Display the "student grade"

Step 4: Input Grade

Step 5: If grade ≥ 96.68 and $L = 100$, Display "The point grade scale is: 1.00"

Else if Grade ≥ 97.34 and $L = 96.67$, Display the grade point scale is: 1.25

Else if grade ≥ 98.34 and $L = 93.33$, Display the grade point scale is: 1.50

Else if grade ≥ 96.68 and $L = 90$, Display "The grade point scale is: 1.75"

Else if Grade ≥ 98.34 and $L = 86.67$, Display "The grade point scale is: 2.00"

Else if grade ≥ 80.01 and $L = 85.33$, Display "The grade point scale is: 2.25"

Else if ≥ 76.68 and $L = 80$, Display "The grade point scale is: 2.50"

Else if grade ≥ 73.34 and $L = 76.67$, Display "The grade point scale is: 2.75"

Else if Grade ≥ 70.00 and $L = 73.33$, Display "The grade point scale is: 3.00"

Else if grade ≥ 80 and $L = 60$, Display "The grade point scale is: 4.00"

Else if grade ≥ 0 and $L = 50$, Display "The grade point scale is: 5.00"

Else: Display "Enter valid grade"

Step 6: End
